

A woman with dark, wavy hair is sitting on a blue cushion against a pink background. She is wearing a white cardigan with dark blue stripes on the sleeves. She is holding a cervical screening swab in her right hand and a clear plastic container in her left hand. The background is a solid pink color.

You have choices for **cervical screening**

Vivian chose to
self-swab at
the clinic

Did you know cervical cancer is preventable?

Early detection through routine screening could save your life.

Women and people with a cervix aged 25–74 should have a **Cervical Screening Test** every 5 years.

Your doctor can do the test, or you can do it yourself using a simple swab.

It's your Cervical Screening Test. **Own It.**

Talk to your doctor next time you're due.
